>
> I live in Stafford Springs, CT My husband & I built our home in 1983
> We went the extra mile to go with wider then called for walls and
> extra drainage around the foundation.. In 1997 we added on a large
> family room and 2 car garage.. Things were great until we started
> noticing hairline spider cracking on the north concrete wall. We
> assumed that it was somewhat normal with the climate changes New
> England faces.. we were not happy but not really scared..... that is
> until the cracks began to grow seperating by as much as half an inch
> in some spots. then we noticed all of the other walls had the same
> similar spider cracking and within months they began to seperate as
> well.
> We saw the segment on channel 3 that Mr colli was doing and instantly
> knew what was going on. we have had an inspection by Mr Bill Neal and
> had our worst fears confirmed.. Our concrete has cancer. We have
> notified our insurance company Liberty Mutual. They have sent people
> out but we have not heard anything else. My garage built in 1997 has
> a large crack in the back.. I am hoping it is just a crack but am not
> sure.. so we have enlisted Brenda Draghi for help. She has been an
> angel.. I am hoping something can be done to help us all. I do not
> have the funds to repair, and I cannot sell it either.
>
> Thankyou,
